STREAMLINE AND OPTIMIZE WORKFLOWS

With the capability to print both monochrome line drawings and eye-catching full-color posters, the imagePROGRAF TX large-format printer series is designed with production and versatility in mind within the aqueous inkjet market.

Key Features:
- **LUCIA TD 5-Color Pigment Ink System**—the Magenta ink and improved line clarity help produce detailed lines and sharp text for CAD designs, signage, and more.
- **Intelligent Media Handling** offers automatic media feeding and media type/length/width detection for enhanced operation that is approximately 34 percent faster than previous generations.
- **Optional Multifunction Roll Unit** acts as a dual-roll unit or a take-up reel for continuous production printing.
- **Environmentally Conscious**—EPEAT® Gold and Energy Star® registered.

Print with more confidence knowing Canon's patented technology and advanced security features are on the job.

LUCIA TD Magenta Pigment Ink
With newly developed magenta ink, the imagePROGRAF TX Series is designed to deliver outstanding red color reproduction suitable for a wide range of markets and applications. The use of pigment ink for all colors helps to ensure prints are resistant to fading, making them ideal for poster output, but also provides water resistance for outdoor prints such as technical documents and line drawings.

Improved Line Clarity
New image processing improvements and LUCIA TD ink help to enhance CAD drawings, blueprints, AEC documentation, and poster reproductions with a large color gamut and improved text and line quality. This makes output more crisp, defined, and clear.

Color Calibration
Now available in the imagePROGRAF TX Series, the ability to calibrate your printer helps ensure your output is color consistent over time and across multiple TX-3200/4200 devices.

Speed*
At up to 3.3 D-size prints per minute and with quicker media loading by approximately 34 percent, these TX printers are faster than the previous models.

Ease of Use
The imagePROGRAF TX Series has been built with production and efficiency in mind with a compact design, semi-translucent ink tank and media covers, an intuitive user interface screen, end-user installable printheads, maintenance cartridges, hot-swap ink tanks, and more! The user interface screen displays the ink and sub-ink tank levels, media indicator levels, and other setting prompts all on the home screen!

Intelligent Media Handling
Once the media is loaded into the imagePROGRAF TX Series, the printer will automatically find the leading edge and feed the media. From there, the imagePROGRAF TX Series will automatically determine the media type, length, and width, which will be shown on the display panel.

Z36 Scanner
Workflow is effortless and consistent with Canon's integration of the scanner with the imagePROGRAF TX Series. Similar to the previous model, the 36" lightweight Z36 scanner is positioned on top of the device, providing a compact, all-in-one solution for ease of use.
- Scan monochrome documents at up to 13" per second and color documents at up to 6" per second
- 15.6" Controller
- Scan up to 1200 dpi

Optional Multifunction Roll Unit
The optional Multifunction Roll System can be used in two different ways.
- Second media roll unit
- Take-up reel

Security Features
The imagePROGRAF TX Series large format printers come equipped with security features designed to help protect confidential information. Features include PIN Printing, self-encrypting hard drive, capabilities to disable the USB port, ethernet port, USB direct thumb drive, and more to help ensure peace of mind for the privacy of your documentation.

Environmentally Conscious
Currently registered as EPEAT® Gold—a first in the imagePROGRAF TX Series— and as ENERGY STAR® certified, these large format printers are replacing EPS packaging materials with cardboard packaging and helping to reduce power consumption.

*3.3 ANSI D prints/minute speed measured after first print in Fast Q5 mode, using plain paper. Print speed is based on internal testing. Print speed may vary depending on the number of copies selected, as well as on the settings for size, type, and orientation of paper.

**All speeds measured using plain paper, Fast Q5 mode. The 199 ANSI D prints/hour is measured from when the first print begins printing. Print speed is based on internal testing. Print speed may vary depending on the number of copies selected, as well as on the settings for size, type, and orientation of paper.

[1]Line accuracy repeatability is guaranteed after a user performs the necessary adjustment and under the same environmental conditions. Applies to media for line drawing (Plain Paper, Coated Paper, CAD Translucent Matte Film, and CAD Tracing Paper) only.
[2]Theoretical value based on data resolution.
[3]The maximum printable length varies depending on the application, OS, and RIP used.
[4]Wireless printing requires a working network with wireless 802.11b/g or 802.11n capability. Wireless performance may vary based on terrain and distance between the printer and wireless network clients.
[5]The scan rate is proportional across the full range of resolutions supported by the scanner. Actual scan times will depend on the host system performance. Quoted top speeds may be limited by the effective bandwidth of the USB 2 and is not guaranteed for all media types.
[6]The quoted scan accuracy may vary depending on the operating environment and the thickness of the media.
